A Cause and Consequence Organizer

Cause and effect diagrams, also called sequence of events diagrams, are a type of graphic organizer that describe how events affect one another in process.

Models of Cause and Effect Events	
Disjointed Events	Cause → Effect
One cause leading to multiple events	Cause → Effect / Effect
Multiple causes leading to one event	Cause / Cause → Effect
Chain of events	Cause → Cause/Effect → Cause/Effect → Effect
Cycle of events	Cause/Effect → Cause/Effect → Cause/Effect → Cause/Effect (cycle)
More complex events in which multiple causes and effects interact	

This information is taken from EnchantedLearning.com where they also have 24 downloadable templates of various diagram types.
